## Self- evaluation

Gentle, mature, diligent, and honest, good at communication, able to capture information sharply, diligent, eager to learn, and active at work. I passed the Chinese medical license examination. Study at Tianjin Medical University (5 years) and Union hospital of Huazhong University (7 years). I accumulate over the years professional knowledge of skin diseases. Under the guidance of professor Huang changzheng, I have good experience in the management of patients in the outpatient clinic and ward, I published high-quality SCI papers; I have active research and writing skills. A strong organizational and robust sense of responsibility and execution even under high pressure and high-stress environment.

## Licenses and Certification

### Merits

1. Yemen Medical License. 2. Chinese Medical license. 3. Member of Yemeni Medical Association. 4. Member of Chinese Doctor Medical Association. 5. 2016 Honorary International graduate. 6. American Dermoscopy Workshop. 7. 2017-2018 HUST academic excellence reward. 8. 2016, 2017 excellent volunteer. 9. 2020 Honorary International graduate.

Master's and a doctorate in dermatology, with Chinese and Yemeni Medical Licensing Certificate. Master the diagnosis and treatment of common skin diseases; familiar with the pathological diagnosis of common skin diseases; can independently perform laboratory tests on skin diseases and sexually transmitted diseases (such as fungal microscopy, Chlamydia psittaci, Mycoplasma); ability to perform dermoscopy to diagnosis common skin diseases, especially skin tumors; familiar with cosmetic procedures such as exfoliation, dermal fillers, botulinum toxin, mesotherapy, laser, and radiofrequency (cynosure (nd: YAG +PDL), ECO2 lutronic( fractional CO2), profile er: YAG (2940nm), OPT, pastellle Q switch (1064, 532), ALEC LAZER (755nm), 308 excimer laser, endymed multisystem radiofrequency device); perfrom botox and filler injection; perform non-invasive skin measurement and imaging techniques ( Dermascopy and Reflectance confocal microscopy, VISIA system, CBS system); skin biopsy and small to medium size skin tumor excision.
