1. Basic and general Information about the program

| | |
|--|---|
| Program Title | Doctor of Pharmacy (Pharm. D.) Program |
| Awarding Institution | 21 September University for Medical & Applied Sciences |
| Institution responsible for the program | Faculty of Clinical Pharmacy |
| Program type | Single |
| Language of Instruction | English |
| Year of study in the program | Six years. |
| Mode of delivery | Regular, minimum attendance 75% |
| Teaching Institution | Faculty of Clinical Pharmacy |
| System of study | Semester Based System |
| Duration of study | Complete 209 credit hours (5 Academic Years + One Hospital Rotation) |
| Final Award/s available | Bachelor's degree |
| Award title | Bachelor of Doctor of Pharmacy (Pharm. D.) degree |
| Prerequisite Qualification for admission to the program | Secondary School Certificate (Scientific Section) |
| Average Grade for Joining the program | As per the admission rules made by Ministry of Higher Education and Scientific Research, Republic of Yemen, and university rules. |
| Other requirements | N/A |
| Coordinator | Dr. Ali Alyahawi |
| Last date of accreditation | N/A |

2. Program Overview:

This program is unique and excellent Pharmacy program in which the graduate obtains the bachelor of Doctor of Pharmacy degree (Pharm. D.). The graduates are distinguished by their knowledge, theoretical and practical skills, and their abilities to work effectively among the health care team. Pharm D program is a 6- year level courses, including five years of academic study and one year of residency in different types of specialized hospitals. The graduate student from this program should be completed 209 credits hours.

Promising Jobs:

After completion of the program, graduates are qualified to practice as pharmacists in any of the following areas:

- Hospitals
- Community pharmacies
- Pharmaceutical Companies
- Research and Development
- Government's health and environmental agencies
- Pharmacovigilance
- Pharmaceutical Industries
- Academia
- Clinics

3. Vision, Mission & Aims of the University.

University Vision:

A Contemporary University with a Sense of National Responsibility and Faith Identity

University Mission:

Leadership of transformation/upturning headway in managing and providing the health care with all partners via having the distinction standard in education and applied and medical researches that meet the needs of Yemeni people and regional influence

University Strategic Objectives:

- 1- Ensuring the application of quality standards and having the distinction standards in medical and applied sciences, scientific research and community service.
- 2- Adopting student-centered learning, the partnership with them for life, consolidating the principles of national responsibility and faith identity, looking after them and developing their capabilities after graduation and during work.
- 3- Attracting and Employing scientists, cadres and talents to gain minds and put an end for the “brain drain” in a way that promotes and ensures the availability of thinkers, businessmen and good citizens.
- 4- Developing the distinguished academic infrastructure continuously and establishing modern research and service centers with high efficiency that can give a real effect locally and regionally.
- 5- Enhancing the university status as a preferred partner for local, regional and international partnership through implementing creative styles of education, exchanging researches and knowledge, and providing real and effective outcomes for developing professional practices to benefit from them locally and regionally.

4. Vision, Mission & Aims of the Faculty of Clinical Pharmacy.

Faculty Vision:

A contemporary college of clinical pharmacy, capable of competitiveness Locally and Regionally.

Faculty Mission:

Preparing distinguished pharmacists scientifically and practically qualified through modern academic programs and achieve excellence in pharmacy education, pharmaceutical research, and community service to meet the requirements of Yemeni society in a professional context.

Faculty Objectives:

Head of Department
Rector

Quality Unit

Dean of the Faculty

Center of Development & Quality Assurance

- 1- Produce graduates capable of provision of high-quality pharmacy care services.
- 2- Graduate pharmacists with all scientific knowledge and skills needed to make therapeutic decisions and evaluate drug information based on evidence-based principles.
- 3- Qualifying pharmacist capable of manufacturing and analyzing all forms of pharmaceutical preparations with their various sources in accordance with GLP and GMP standards.
- 4- Graduate pharmacists with all basic information to manage human and material resources effectively and communicate ethically with health care workers based on scientific principles.
- 5- Graduate pharmacists with basic skills of the scientific research and the use of medication in the health care system.
- 6- Effective contribution to community service and meeting the requirements of the labor market.

5. Program Standards & Benchmarks.

A. Academic Standards:

1. National Academic Reference Standards for Undergraduate Pharmacy Education Program (Doctor of Pharmacy/ PharmD), April 2022 (First Edition)
2. Criteria for Accrediting in Yemen council of academic accreditation .

B. Government Rules and Regulations:

1. Act No. 13/2005 of the Law of private universities, higher institutes and colleges, Yemen.
2. The executive regulations of Act No. 13/2005 of the Law of private universities, higher institutes and colleges, Yemen.

6. Mission & Aims of the Program.

Program Mission:

To prepare competent pharmacists to serve as medication experts and capable of providing high quality pharmaceutical care services through achieving excellence and innovation in pharmacy education, pharmaceutical research, and community service to meet the requirements of the health and quality of care locally and globally.

Aims of the Program:

1. Graduate distinguished pharmacists with professional essential skills such as teamwork, leadership, creative thinking, and work ethics.
2. Providing students with basic and professional knowledge leading to the Pharm D degree
3. Provide students with professional abilities to provide patient-centered care through the provision of safe and effective medicines
4. Provision of continued pharmaceutical education and participation in the field of scientific publications
5. Participate in process of improving professional qualification and competency locally, regionally, and internationally.

7. Graduate Attributes of the program

Upon successful completion of an undergraduate Doctor of Pharmacy (Pharm. D.) program, the graduates will be able to:

1. Develop, integrate, and apply knowledge from the foundational and clinical sciences related to pharmacy education and practice.
2. Provide a patient-centered care as the medication expert.
3. Identify problems; explore and prioritize potential strategies; and design, implement, and evaluate a viable solution through evaluating medical literature, conducting pharmaceutical research in pharmacy settings, and updating information.

Head of Department

Quality Unit

Dean of the Faculty

Center of Development & Quality Assurance

7

Rector

4. Work ethically and legally as part of a team with leadership and communication skills.

5. Express self-awareness for continuous professional improvement.

8. Program Intended Learning Outcomes (PILOs)

❖ PILOs of Knowledge and Understanding Skills:

Upon successful completion of an undergraduate Doctor of Pharmacy degree (Pharm. D.) program, the graduates will be able to:

A1. Define the fundamentals of scientific knowledge and principles of biomedical, pharmaceuticals, social, behavioral, administrative, therapeutics, and other basic sciences related to the pharmacy profession.

A2. Illustrate the physicochemical and pharmacokinetic properties of medicines and their influence on compounding, evaluation, analysis, route of administration, and dosage regimen.

A3. Identify broad knowledge about the mechanism of action, effectiveness, use, safety, side effects, and interactions of therapeutic agents as well as the complementary therapies.

A4. Recognize the advanced concepts of professional (ethics, policies, laws, regulations requirements, management, pharmacovigilance, Pharmacoepidemiology, pharmacoeconomic, pharmacoinformatic, research studies, sources of information.... etc) to optimize the therapeutic outcomes.

A5. Describe the role of pharmacists in patient care; dispensing, designing, implementing, monitoring, evaluating, and adjustment of medication therapy plans that are patient-specific and evidence-based to achieve maximum clinical effectiveness.

❖ PILOs of Intellectual Skills:

Upon successful completion of an undergraduate Doctor of Pharmacy degree (Pharm. D.) program, the graduates will be able to:

B1. Integrate the physicochemical properties of medicines to compounding, preparation, and analysis of parenteral nutrition, I.V admixtures, and small-batch preparation.

B2. Predict the drug properties including the bio-pharmaceutics, pharmacokinetics, pharmacodynamics and their applications.

Head of Department
Rector

Quality Unit

Dean of the Faculty

Center of Development & Quality Assurance

B3. Merge the pharmacological knowledge about natural and synthetic medicines with policies, information systems, workforces, service delivery, pharmacovigilance, pharmacoepidemiology, and pharmaco-economic factors to enhance the healthcare systems.

B4. Formulate an appropriate pharmacotherapy care plan and monitoring strategies to solve practice problems and improve patient safety and efficacy through utilization of pharmacodynamic, pharmacokinetic parameters of medicines as well as diseases pathophysiology and research outcomes.

B5. Compare various therapeutic options using scientific research and evidence-based practice to optimize efficacy, safety, and cost for each drug-related problem.

❖ PILOs of Professional Skills and Practices:

Upon successful completion of an undergraduate Doctor of Pharmacy degree (Pharm. D.) program, the graduates will be able to:

- C 1. Deal safely and effectively with biotechnological, radio-pharmaceuticals, and synthetic/natural pharmaceutical materials/products used in pharmaceutical preparations.
- C 2. Compound/prepare extemporaneous, cytotoxic, I.V admixture, parenteral nutrition, and small-batch pharmaceutical preparation taking into account the physicochemical properties of drug structures.
- C 3. Contribute to creating/improving national drug policies, laws, and regulations related to the health care systems.
- C 4. Implement patient-oriented pharmaceutical care legally and ethically in a variety of patient care settings in collaboration with patients and other health care professionals according to professional standards, appropriate therapeutic guidelines, and research outcomes.
- C 5. Contribute to pharmaceutical research studies and clinical trials needed to enhance professional decisions to optimize medicine use in specific medical conditions

❖ PILOs of General and Transferable Skills:

Upon successful completion of an undergraduate Doctor of Pharmacy degree (Pharm. D.) program, the graduates will be able to:

- D 1. Display ethically and legally leadership, time management, critical thinking, problem-solving, communication, team-work, independence, creativity, innovation, entrepreneurial, delegation, and organizational skills
- D 2. Develop life-long learning, in particular an awareness of the need for continuing education, research, scholarship, and professionalism in the field of pharmaceutical practice.

13. Teaching and Learning Strategies.

A. Teaching Tools.

- Active Lectures (supported with discussion),
- Group learning and Problem-based learning,
- Seminars, journal clubs and workshops,
- Practical classes,
- Field training,
- Simulated software program
- Field visits to industries,
- Computer and web-based learning,
- Use of communication and information technology,
- Project work,
- Directed self-study.

B. Assessment Tools.

- Short essays,
- Written assessments, such as multiple-choice questions (MCQs),
- Faculty assessment by structured observation through checklists and rating scales,
- Seminar assessment,
- Multi-source assessments, such as student self-assessment,
- Simulations, such as computer-based clinical scenarios,
- summative practical assessments,
- Graduate project.
- laboratory and other written reports,
- Work samples, such as, logbooks and portfolios.

A. Teaching Strategies:

It includes description of teaching strategies to achieve learning out comes of the program (lecture, seminar, laboratory, groups, etc. with description of how to use them and average of each of in every course

| Teaching Strategy | Description of how it will be used |
|-------------------|--|
| Lectures | It is the most frequently employed teaching method to convey knowledge and explain theories to students in large groups (50-100) or in sessions, which consist of more than one group gathered in one classroom. |
| Seminars | These are mainly used with small groups of students in which they find better chances for discussing and negotiating the different concerns of their studies. |
| Lab experiments | Students doing practices in medical labs individually or in small groups. |
| Training | This is a practical kind of course where the students are required to plan and execute some field visits to hospitals, corporations or institutions where the process of clinical pharmacy is essential. |
| Discussion | This is done by allowing the students to ask questions during the lecture and respond to them by the lecturer or other students for the purpose of establishing and clarify the subject of the lecture strongly and increase the concentration and absorption of the student and the attention and not to enter the boredom. |
| Presentations | Helps the students to be more confident with themselves and make them to show the others what knowledge they have acquired. It can be followed in many types of courses and tasks. |
| Self-learning | Self-learning is the process by which learners teach themselves using any materials or resources to achieve clear goals without the direct help of the teacher |
| Case study | Case studies are defined as the scientific documentation of a single clinical observation which is so important study design in advancing medical scientific knowledge especially of rare disease. |
| Office Hours | Office hours are hours determined by the faculty member (professor of the course) to which the student studies. The hours allocated by the professor to meet with his students to help them and answer their queries in the event of any questions they may not be enough time for the lecture to answer it. |
| Case Studies | The case study is defined as an in-depth descriptive presentation of a particular position or model for the purposes of educational research or for training and education purposes. |

B. Assessment Strategies.

| Assessment Strategy | Its description (in which course it will be used and in which rate) |
|---|--|
| Written examinations | Mid-term test is conducted between 6 th to 8 th Class and final exam is conducted at the end of each course. |
| Oral exams | For selected courses |
| Technical or practical reports /Presentations | As indicated in the course specification |

Head of Department

Rector

Quality Unit

Dean of the Faculty

Center of Development & Quality Assurance

32

| | |
|--|--|
| Assignments including problem-solving exercises | The entire assignments including problem-solving exercises of coursework activities during the teaching period of each course. (Which includes group and individual work, tests and presentations, etc.) |
| Individual and group project work | As indicated in the course specification |
| Quizzes | For all courses except for project |
| Home work | For all courses except for project |

C. Project Assessment: Each project will be assessed by a committee of three members as follows:

| Items | Marks Distribution |
|--|--------------------|
| Project supervisor | 70 % |
| Internal examiner: a member of the department teaching staff. | 15 % |
| External examiner: a qualified external examiner (either from other departments of the college or from another university) | 15% |
| Total | 100% |

14. Alignment of Program Intended Learning Outcomes (PILOs) to Teaching Strategies and Assessment Methods.

(A) Alignment of Program Intended Learning Outcomes (Knowledge and Understanding) to Teaching Strategies and Assessment Methods:

| PILOs | Teaching Strategies | Assessment Methods |
|--------------------|---|---|
| A1, A2, A3, A4, A5 | <ul style="list-style-type: none"> ○ Lectures. ○ Exercises in lectures and seminars ○ Presentations and discussions in class | <ul style="list-style-type: none"> ○ Written examinations ○ Quizzes ○ Home work ○ Assignments |

Head of Department
Rector

15. Admission Requirements:

1. Admissions to the program shall be made as per the University admission guidelines and admission rules set by the Ministry of Higher Education and Scientific Research
2. General Secondary school certificate (Science Section) or any equivalent certificate with grade as specified in the admission rules made by Ministry of Higher Education and Scientific Research.
3. Pass the admission test and personal interview.
4. Any necessary requirement for specialization, decided by the Scientific Section.

16. Attendance requirements and graduation

1. Student attendance should not be less than 75% in each course.
2. Student will graduate after successfully passing all program requirements.
3. Total credit hours for the program is 209 credit hours.
4. Minimum score for any student to pass any credit hours course is 50% degree.

17. Grading System

| | |
|-----------------------------------|-----------|
| From 90% to 100% from total marks | Excellent |
| From 80% to less than 90% | Very Good |
| From 65% to less than 80% | Good |
| From 50% to less than 65% | Pass |
| Less than 50% | Poor/Fail |

Head of Department
Rector

Quality Unit

Dean of the Faculty

Center of Development & Quality Assurance

18. Facilities required for running the program

Sources of learning:

1. Lecture rooms with facilities
2. Labs with facilities
3. Training in different hospital departments
4. Library study room and electronic library (books as write in each course specification)
5. Internet and professional information access

19. Program Assessment:

| Type of the Sample who Assess the program | | Instruments used | Sample |
|---|--|--|---------------|
| 1 | Final Year Students | Surveys as Program ILOs Questionnaire sheet | 20 |
| 2 | Graduates from the program | Program ILOs Questionnaire sheet | 10 |
| 3 | Center of Development & Quality Assurance | Internal Evaluation (yearly) | All Items |
| 4 | Stake holders | Surveys or Periodic meeting using Program ILOs Questionnaire sheet | 10 |
| 5 | One faculty member from other University as External Evaluator | Program evaluation tool + Course evaluation tool | 4 |
| 6 | Others methods | As Required | Other methods |

Head of Department
Rector

 
Quality Unit
Dean of the Faculty

Center of Development & Quality Assurance

20. Program Policies:

Based on University Regulations

| | |
|----|---|
| 1. | (Class Attendance): A student should attend not less than 75 % of total hours of the subject; otherwise, he/she will not be able to take the exam and will be considered as exam failure. If the student is absent due to illness, he/she should bring a proof statement from university Clinic. If the absent is more than 25% of a course total contact hour, student will be required to retake the entire course again. |
| 2. | (Tardy) : For late in attending the class, the student will be initially notified. If he repeated lateness in attending class he/she will be considered as absent. |
| 3. | (Exam Attendance/Punctuality) : A student should attend the exam on time. He/she is permitted to attend an exam half one hour from exam beginning, after that he/she will not be permitted to take the exam and he/she will be considered as absent in exam. |
| 4. | (Assignments & Projects) : Assignments and projects are given as per course specification; the student has to submit all the assignments for checking on time, mostly one week after given the assignment. |
| 5. | (Cheating) : For cheating in exam, a student will be considered as fail. In case the cheating is repeated three times during his/her study the student will be disengaged from the faculty. |
| 6. | (Plagiarism) : Plagiarism is the attending of a student the exam of a course instead of another student. If the examination committee proofed a plagiarism of a student, he/she will be disengaged from the faculty. The final disengagement of the student from the faculty should be confirmed from the Student Council Affair of the university or according to the university roles. |
| 7. | (Other policies) : <ul style="list-style-type: none">- Mobile phones are not allowed to use during a class lecture. It must be closed; otherwise, the student will be asked to leave the lecture room.- Mobile phones are not allowed in class during the examination.- Lecture notes and assignments might be given directly to students using soft or hard copy. |

| University of Hadramout, Yemen | University of Science and Technology, Yemen | Jordan University of Science & Technology (JUST), Jordan | Al King Faisal University, KSA | Eastern Mediterranean University, Cyprus | Long Island University, USA | Egypt, NAQAAE (2018). National Academic Reference Standards, Pharmacy, First Edition | ACPE, USA, 2015 |
| <p>Program PILOs</p> <p>Knowledge and Understanding: A1. Define the fundamentals of scientific knowledge and principles of biomedical, pharmaceuticals, social, behavioral, administrative, therapeutics, and other basic sciences related to the pharmacy profession. A2. Illustrate the physicochemical and pharmacokinetic properties of medicines and their influence on compounding, evaluation, analysis, route of administration, and dosage regimen. A3. Identify broad knowledge about the mechanism of action, effectiveness, use, safety, side effects, and interactions of therapeutic agents as well as the</p> | <p>C. Program Intended Learning Outcomes A. Knowledge and Understanding Program Outcomes Biomedical Sciences: A1. Define the fundamentals of the biomedical sciences including structure of the body, normal and abnormal body function, basis of genomes and different biochemical pathways and their relations with different diseases. Pharmacokinetic Sciences: A2. List the sources, purification methods, physico-chemical properties, molecular structure and design of substances used in medicine</p> | <p>Domain 1: Foundational knowledge: 1.1 Learner: Develop, integrate, and apply knowledge from the social/behavioral/administrative, health, and clinical sciences (i.e., pharmacy, collaborate with people from related disciplines during the data collection, interpretation, application, and announcement stages, acting in accordance with social, scientific, cultural, and ethical norms, A2. Describe the pharmaceutical and Biomedical Courses</p> | <p>1. Knowledge 1.1 Describe essential biomedical, pharmaceutical, social, behavioral, administrative and clinical sciences related to the development and use of medications, natural remedies, and other therapies for prevention and treatment of diseases. (almost all Pharmaceutical and Biomedical Courses) 1.2 Describe the concepts and principles of various</p> | <p>Expected Competencies for Pharm D. Graduates In the field of pharmacy, collaborate with people from related disciplines during the data collection, interpretation, application, and announcement stages, acting in accordance with social, scientific, cultural, and ethical norms, Acquire knowledge and application ability on pharmaceutical field, Identify the problems about</p> | <p>Domain 1—Foundational Knowledge 1.1 Learner (Learner): Develop, integrate, and apply knowledge from the foundational sciences (i.e., pharmaceutical, social/behavioral/administrative, health, and clinical sciences) to evaluate the scientific literature, explain drug action, solve therapeutic problems, and advance population health and patient-centered care. Learning Outcomes 1.1.1. Develop and demonstrate depth and breadth of knowledge in pharmaceutical, social/behavioral/administrative, health, and clinical sciences. 1.1.2. Articulate how sciences is integral to clinical reasoning, evaluation of future advances in medicine and pharmacy, supporting health and wellness initiatives; and delivery of contemporary pharmacy services.</p> | <p>Standard 1: Foundational Knowledge The professional program leading to the Doctor of Pharmacy degree (hereinafter "the program") develops in the graduate the knowledge, skills, abilities, behaviors, and attitudes necessary to apply the foundational sciences to the provision of patient-centered care. Key Element: 1.1. Foundational knowledge – The graduate is able to develop, integrate, and apply knowledge from the foundational sciences (i.e., biomedical, pharmaceutical, social/behavioral/administrative, and clinical sciences) to evaluate the scientific literature, explain drug action, solve therapeutic problems, and advance population health and patient-centered care Standard 2: Essentials for Practice and Care The program imparts to the graduate the knowledge, skills,</p> | |

| <p>complementary therapies.</p> <p>A4. Recognize the advanced concepts of professional (ethics, policies, laws, regulations requirements, management, pharmacovigilance, pharmacoeconomic, pharmacoinformatic, research studies, sources of information.... etc) to optimize the therapeutic outcomes.</p> <p>A5. Describe the role of pharmacists in patient care; dispensing, designing, implementing, monitoring, evaluating, and adjustment of medication therapy plans that are patient-specific and evidence-based to achieve maximum clinical effectiveness.</p> <p>Cognitive/ Intellectual Skills:</p> <p>B1. Integrate the physicochemical properties of medicines to compounding, and preparation, and analysis of parenteral</p> | <p>رقف اسس طميه . B2 يتم إنتاج الأشرطة الصيدلانية بكمية وبقا لأفضل الممارسات المهنية على الألة B3 . المشكلة بالبحث لتطوير وتقييم وتحسين الممارسات الصيدلانية والإدارية C1 يتشارك مع الطبيب المعالج في اختيار الدواء المناسب والحالة السريرية وتقييم الاستشارة C2 . يشكل مباشر على العلاج الدوائي للمرضى المرتقنين وتقييم نتائج العلاج المعطى للمرضى</p> | <p>A3. Recall the properties of formulations additives, principles of medicines formulation and manufacturing techniques, and pharmaceutical analytical methods.</p> <p>A4. Identify the actions of medicines within living systems; pharmacokinetics and pharmacodynamics of drugs, therapeutic uses of medicines in humans, adverse reactions, interactions of medicines, and their significance in treatment.</p> <p>A5. Relate the etiology, epidemiology, laboratory diagnosis and clinical features of different diseases and their pharmacotherapeutic approaches.</p> <p>The behavioral, social, and administrative pharmacy sciences</p> | <p>(collect and interpret evidence, prioritize, formulate assessments and recommendations, monitor and adjust plans, and document activities .</p> <p>2.2 Manager (Medication use systems management); Manage patient healthcare needs using human, financial, technological, and physical resources to optimize the safety and efficacy of medication use systems.</p> <p>2.3 Promoter (Health and wellness): Design prevention, intervention, and educational strategies for individuals and communities to manage chronic disease and</p> | <p>pharmacy practice settings . L3 Recognize the role of pharmacists according to legal, ethical, and professional standards in promoting health, and the prevention and treatment of diseases.</p> <p>2 .Skills 2.1 Integrate pharmaceutical sciences with pharmacy applications (in practice, administration and research).</p> <p>2.2 Engage in inter-professional healthcare education activities.</p> <p>2.3 Evaluate scientific and professional literature critically to be evidence-based practice, conducting research and problem-solving.</p> | <p>pharmaceutical field, Express their knowledge from a scientific point of view, Adopt the culture of project-based working, Acquire professional and ethical responsibilities, Master in current health and therapy problems, Uses computer programs, technology, and teaching resources relevant to pharmacy, Comply with quality management procedures, and take part in quality management processes, Comply with relevant laws, regulations and legislations and professional</p> | <p>therapeutic uses of medicines in human, adverse reactions, interactions of medicines, toxicity, and misuse or abuse. A6. Explain the basis of complementary and alternative medicine. A7. Identify the types of poisonous substances, sources, mechanisms of toxicity, analysis, clinical pictures, and management. A8. Describe the bio-pharmacokinetics of medicines and their applications. A9. Define the basis of health policy, pharmacoeconomics, pharmacoepidemiology, marketing, and administration with reference to pharmacy. A10. Describe the pharmacist's role in health care; dispensing, designing, implementing, monitoring, evaluation, and adjustment of medication therapy plans that are patient-specific and evidence-based to achieve maximum clinical effectiveness.</p> <p>A11. Identify the properties of different pharmaceutical dosage forms including novel drug delivery systems and biotechnology. A12. Describe the methods of bio-statistical analysis and pharmaceutical calculations.</p> | <p>abilities, behaviors, and attitudes necessary to provide patient-centered care, manage medication use systems, promote health and wellness, and describe the influence of population-based care on patient-centered care. Key Elements: 2.1. Patient-centered care – The graduate is able to provide patient-centered care as the medication expert (collect and interpret evidence, prioritize, formulate assessments, and recommendations, implement, monitor and adjust plans, and document activities). 2.2. Medication use systems management – The graduate is able to manage patient healthcare needs using human, financial, technological, and physical resources to optimize the safety and efficacy of medication use systems. 2.3. Health and wellness – The graduate is able to design prevention, intervention, and educational strategies for individuals and communities to manage chronic disease and improve health and wellness. 2.4. Population-based care – The graduate is able to describe how population-based</p> |

| <p>nutrition, IV admixtures, and small-batch preparation. B2. Predict the drug properties including the bio-pharmaceutics, pharmacokinetics, pharmacodynamics and their applications. B3. Merge the pharmacological knowledge about natural and synthetic medicines with policies, information systems, workforces, service delivery, pharmacovigilance, and pharmacoepidemiology, and pharmacoeconomic factors to enhance the healthcare systems. B4. Formulate an appropriate pharmacotherapy care plan and monitoring strategies to solve practice problems and improve patient safety and efficacy through utilization of pharmacodynamic, pharmacokinetic parameters as well as diseases pathophysiology and research outcomes.</p> | <p>وتوثيق السجل الدوائي بشفء. بطبق C3 بروروكولات تقديم الرعاية الصيدلانية السريرية . يتناول D1 بعناية مع الآخرين نظماً D2 . قراء العمل الجماعي بروج الفريق الواحد مع أعباء المسؤولة المدنية الأخلاقية والتقابلية.</p> | <p>A6. Review the fundamentals of social and behavioral sciences relevant to pharmacy, ethics of health care, health care systems, health policy and economics, pharmacy law, and causes and prevention of medical errors. Clinical Sciences and Practice Skills A7. Illustrate the pharmacist's role in health care; managing medicines; responding to symptoms, non-prescription drug use, compounding, dispensing, provision of medicine and patient information, documentation, reporting of adverse reactions of medicines, drug information, and drug abuse. B. Intellectual Skills B1. Integrate the relevant knowledge</p> | <p>improve health and wellness. 2.4. Provider (Population-based care): Describe how population-based care influences patient-centered care and influences the development of practice guidelines and evidence-based best practices. Domain 3: Approach to Practice and Care 3.1 Problem Solver: Identify problems; explore and prioritize potential strategies; and design, implement, and evaluate a viable solution. 3.2 Educator: Educate all audiences by determining the most effective and enduring ways to impart</p> | <p>2.4 Apply basic drug development skills in relevant settings. 3. Competencies 3.1. Autonomy and responsibility 3.1.1 Demonstrate leadership skills, accountability, and acceptance of responsibility within a team in various settings. 3.1.2 Advocate patient rights to safe and effective medication use in various settings. 3.1.3 Practice reflective and independent thinking to effectively manage and respond to unanticipated circumstances. 3.2. Practice appropriate information technologies to</p> | <p>ethical rules related with individual duties, rights and responsibilities, Serve as a role model for colleagues and a reference model for society with their physical appearance, attitudes, behaviours and professional identity, Distinguish physiological functions and behaviours of healthy and unhealthy individuals and describe the relationship between individuals' health and their physical and social environments. Attend institutional, local, national and international training</p> | <p>disease(s), by performing patient assessment (including physical assessment, screenings, and risk assessments scores when needed) from chart/electronic health records, pharmacist records, and discussions with other health professionals and the patient/family/care-giver. 2.1.2. Interpret evidence and patient data. 2.1.3. Prioritize patient needs. 2.1.4. Formulate an evidence-based care plan, assessment, and recommendation. 2.1.5. Implement and/or recommend patient care plans. 2.1.6. Monitor the patient and adjust the care plan as needed. 2.1.7. Document patient care related activities. 2.2. Medication use systems management (Manager): Manage patient healthcare needs using human, financial, technological, and physical resources to optimize the safety and efficacy of medication use systems. Learning Outcomes 2.2.1. Compare and contrast the components of typical medication use systems in different pharmacy practice settings. 2.2.2. Describe the role of the pharmacist in impacting the safety and efficacy of each</p> | <p>B-COGNITIVE/INTELLECTUAL SKILLS: B1. Collect, interpret and assess relevant pharmaceutical and biomedical sciences to construct the pharmacophores of the structure and their effect on the stability, pharmacokinetic and pharmacodynamics profile of the drug. B2. Classify the synthetic and natural drugs according to their mechanism of action, systemic effect, therapeutic uses, contraindication and toxicity. B3. Design and evaluate different types of safe and effective pharmaceutical dosage forms. B4. Select appropriate Standard Operating Procedures (SOP) to conduct qualitative and quantitative analysis of pharmaceutical preparations. B5. Plan a modern system for administration of medical foundations and merge the ethics to business in the drug marketing B6. Develop and design suitable methods for extraction, isolation, purification, identification, and standardization of active substances from various sources. B7. Formulate and evaluate patient care plan about the rational use of medications to improve patient safety and</p> | <p>care influences patient-centered care and the development of practice guidelines and evidence-based best practices. Standard 3: Approach to Practice and Care The program imparts to the graduate the knowledge, skills, abilities, behaviors, and attitudes necessary to solve problems; educate, advocate, and collaborate, working with a broad range of people; recognize social determinants of health; and effectively communicate verbally and nonverbally. Key Elements: 3.1. Problem solving – The graduate is able to identify problems; explore and prioritize potential strategies; and design, implement, and evaluate a viable solution. 3.2. Education – The graduate is able to educate all audiences by determining the most effective and enduring ways to impart information and assess learning. 3.3. Patient advocacy – The graduate is able to represent the patient's best interests. 3.4. Interprofessional collaboration – The graduate is able to actively participate and</p> |

|--|--|--|--|--|--|---|--|
| <p>B5. Compare various therapeutic options using scientific research and evidence-based practice to optimize efficacy, safety, and cost for each drug-related problem.</p> <p>C. Practical and Professional Skills: C 1. Deal safely and effectively with biotechnological, radio-pharmaceuticals, and synthetic/natural pharmaceutical materials/products used in pharmaceutical preparations. C2.Compound/prepare extemporaneous, cytotoxic, I.V admixture, parenteral nutrition, and small-batch pharmaceutical preparation taking into account the physicochemical properties of drug structures. C 3. Contribute to creating/improving national drug policies, laws, and regulations related to the health care systems . C 4. Implement patient-oriented pharmaceutical care</p> | <p>and understanding required to meet the needs of patients and other health care professionals B2. Propose medicine doses, dosage regimens related to normal and abnormal clinical situations. B3. Interpret prescription, medication orders, pharmaceutical information, clinical data, including patient records held within practice settings. B4. Select the appropriate methods of isolation, synthesis, purification, identification, standardization, and formulation of active substances from different origins. Professional and Practical Skills C1. Handle the chemical, biological, and pharmaceutical materials safely. taking into account</p> | <p>information and assess understanding. 3.3 Advocate (Patient Advocacy): Assure that patients' best interests are represented. 3.4 Collaborator (Interprofessional collaboration): Actively participate and engage as a healthcare team member by demonstrating mutual respect, understanding, and values to meet patient care needs. 3.5 Include (Cultural sensitivity): Recognize social determinants of health to diminish disparities and inequities in access to quality care. 3.6 Communicator: Communicate</p> | <p>optimize medication use and patient care. 3.2.2 Contribute to decision-making processes by providing accurate and relevant recommendations in various settings (clinical, administration, drug development). 3.2.3 Interpret information obtained from different resources to provide creative solutions for complex problems. 3.2.4 Communicate clearly and effectively with health care professionals, patients, caregivers, administrative and supportive personnel and the public in various settings.</p> | <p>programmes after graduation, Gain experience in other health disciplines, Communicate effectively in oral and written form, Critically evaluate advanced knowledge and skills acquired in the field of pharmacy, Conduct a study independently, using advanced pharmaceutical knowledge; and take responsibility as a team member in cooperation with other professional groups working in this field, Be aware of the ways to access scientific information, and keep up</p> | <p>component of a typical medication use system (i.e., procurement, storage, prescribing, transcription, dispensing, administration, monitoring, and documentation). 2.2.3. Utilize technology that is a component to or of the medication use system. 2.2.4. Identify and utilize human, financial, and physical resources to optimize the medication use system. 2.2.5. Manage medication needs of patients during transitions of care. 2.2.6. Apply standards, guidelines, best practices, and established processes related to safe and effective medication use. 2.2.7. Utilize continuous quality improvement techniques in the medication use process and participate in identifying system errors and, when possible, implement solutions. 2.2.8. Demonstrate the ability to compound extemporaneous and commercially available dosage forms, dispense, and administer medications in a variety of healthcare settings. 2.2.9. Apply legal, ethical, and professional standards within a medication use system.</p> | <p>efficacy. B8. Use appropriate research methods to solve practice problems. B9. Apply pharmaceutical calculation in different pharmaceutical practice. C- PRACTICAL AND PROFESSIONAL SKILLS: C1. Handle the chemical, biological, and pharmaceutical materials safely, taking into account their physical and chemical properties, including any specific hazards associated with their use, distribution, and storage. C2. Operate different pharmaceutical equipment and instruments and use emerging technologies in pre-formulation, formulation, packaging, storage and analysis of pharmaceutical products according to Good Laboratory Practice (GLP), Good Storage Practice (GSP) and cGMP guidelines. C3. Screen drug from different sources, bioassay, and carry out pharmacological and biopharmaceutical experiments. C4. Extract, isolate, purify, identify, standardize, formulate natural products and assure their rational use. C5. Advise the patients and health care professionals to optimize medicines use. C6. Employ the relevant ways of preparation and presentation of</p> | <p>engage as a healthcare team member by demonstrating mutual respect, understanding, and values to meet patient care needs. 3.5. Cultural sensitivity – The graduate is able to recognize social determinants of health to diminish disparities and inequities in access to quality care. 3.6. Communication – The graduate is able to effectively communicate verbally and nonverbally when interacting with individuals, groups, and organizations. Standard 4: Personal and Professional Development The program imparts to the graduate the knowledge, skills, abilities, behaviors, and attitudes necessary to demonstrate self-awareness, leadership, innovation and entrepreneurship, and professionalism. Key Elements: 4.1. Self-awareness – The graduate is able to examine and reflect on personal knowledge, skills, abilities, beliefs, biases, motivation, and emotions that could enhance or limit personal and professional growth.</p> |

| <p>legally and ethically in a variety of patient care settings in collaboration with patients and other health care professionals according to professional standards, appropriate therapeutic guidelines, and research outcomes.</p> <p>C 5. Contribute to pharmaceutical research studies and clinical trials needed to enhance professional decisions to optimize medicine use in specific medical conditions</p> <p>D. General and Transferable Skills: D 1. Display ethically and legally leadership, time management, critical thinking, problem-solving, communication, teamwork, independence, creativity, innovation, entrepreneurial, and delegation, and organizational skills</p> <p>D 2. Develop lifelong learning, in particular an awareness of the need for continuing education, research, scholarship, and professionalism in the field of</p> | <p>their physical and chemical properties, including proper operation of pharmaceutical instruments.</p> <p>C2. Execute the planning, design and carrying out of pharmaceutical research investigations, from the problem-recognition stage through to the evaluation and appraisal of results and findings.</p> <p>C3. Employ the relevant way of analysis, preparation, determination of quality, and presentation of medicines, by manufacture and extemporaneous dispensing.</p> <p>C4. Advise the patient and health care professionals on the safe and effective use of medicines as well as developing and supporting therapeutic plans with</p> | <p>Effectively communicate verbally and nonverbally when interacting with an individual, group, or organization.</p> <p>Domain 4: Personal and Professional Development 4.1 Self-aware: Examine and reflect on personal knowledge, skills, abilities, beliefs, biases, motivation, and emotions that could enhance or limit personal or professional growth.</p> <p>4.2 Leader: Demonstrate responsibility for creating and achieving shared goals, regardless of position.</p> <p>4.3 Innovator (Innovation and Entrepreneurship): Engage in innovative activities by using</p> | <p>3.2.5 Construct patient-centered evidence-based pharmaceutical care plans.</p> <p>3.3. Attribute the interprofessional approach to healthcare practices. (IPE)</p> <p>3.3.2 .Display integrity, trustworthiness, confidence, self-awareness and the potential of entrepreneurship in various settings.</p> <p>3.3.3. Demonstrate empathy, professional attitude, ethical behavior, social and cultural awareness and proper judgement in various settings.</p> | <p>with the literature in the field, Provide appropriate and effective treatment of health problems, integrate data from patient and medical records to treatment, to develop a plan for treatment using evidence based medicine</p> | <p>2.2.10. Apply the principles of human resource management to manage pharmacy personnel.</p> <p>2.2.1.1. Demonstrate knowledge of and an ability to use medical informatics.</p> <p>2.2.1.2. Demonstrate the ability to apply a systems approach to improve patient (medication) safety.</p> <p>2.3. Health and wellness (Promoter): Design prevention, intervention, and educational strategies for individuals and communities to manage disease and improve health and wellness.</p> <p>Learning Outcomes 2.3.1. Describe systematic preventive care, using risk assessment, risk reduction, screening, education, and immunizations.</p> <p>2.3.2. Provide prevention, intervention, and educational strategies for individuals and communities to improve health and wellness.</p> <p>2.3.3. Participate with interprofessional healthcare team members in the management of and health promotion for patients.</p> <p>2.3.4. Evaluate personal, social, economic, and environmental conditions to maximize health and wellness.</p> <p>2.4. Population-based care (Provider): Describe the way in</p> | <p>medicines including extemporaneous, Total Parenteral Nutrition (TPN), and Intravenous (I.V.) admixtures, C7. Apply administrative and pharmacoeconomic rules in pharmacy and ethically use marketing skills for promoting the pharmaceutical and cosmetic products.</p> <p>C8. Conduct research studies and utilize the results in different pharmaceutical fields.</p> <p>D – GENERAL / TRANSFERABLE SKILLS: D1. Interact and communicate effectively and ethically with patients, public, and health care professionals. D2. Apply financial, management, decision-making, time management, organization, sales and marketing skills. D3. Appraise the importance of team work and the need to work within personal limitations. D4. Take responsibility for adaptation to change in pharmacy practice. D5. Retrieve the essential references of evidence-based practice to achieve maximum clinical effectiveness.</p> | <p>4.2. Leadership – The graduate is able to demonstrate responsibility for creating and achieving shared goals, regardless of position.</p> <p>4.3. Innovation and entrepreneurship – The graduate is able to engage in innovative activities by using creative thinking to envision better ways of accomplishing professional goals.</p> <p>4.4. Professionalism – The graduate is able to exhibit behaviors and values that are consistent with the trust given to the profession by patients, other healthcare providers, and society.</p> |

| <p>pharmaceutical practice. D 3. Use digital pharmacy health improvement and educational technologies efficiently.</p> | <p>monitoring with the capability to refer patients to other health care professionals when required. C5. Implement class room training in hospital setting practice by providing interventions and recommendations about treatment strategies directly to preceptors during clinical training. Intended Learning Outcomes D. General Skills D1. Interact effectively with patients, the public and health care professionals; including both written and oral communications. D2. Retrieve information in relation to primary and secondary information sources, to analyze the published literature. D3. Adopt ethical, legal and safety guidelines which</p> | <p>creative thinking to envision better ways of accomplishing professional goals. 4.4 Professional: Exhibit behaviors and values that are consistent with the trust given by the profession by patients, other healthcare providers, and society. Domain 5: Pharmaceutical product expert 5.1 Manufacturer: Carries out compounding procedures to produce an effective and safe medicine (Compounder) and implements quality control measures and tests (Quality Manager)</p> | <p>which population-based care influences patient-centered care and influences the development of practice guidelines and evidence-based best practices. Learning Outcomes 2.4.1. Assess the healthcare status and needs of a targeted patient population. 2.4.2. Develop and provide an evidence-based approach to care that considers the cost, care, access, and satisfaction needs of a targeted patient population. 2.4.3. Participate in actual or simulated population health management by evaluating and adjusting interventions to improve health. Domain 3—Approach to Practice and Care 3.1. Problem Solving (Problem Solver): Identify problems; explore and prioritize potential strategies; and design, implement, and evaluate a viable solution. Learning Outcomes 3.1.1. Identify and define all relevant problems. 3.1.2. Select between the primary as well as secondary problems. 3.1.3. Define goals and alternative goals. 3.1.4. Explore multiple solutions by organizing, prioritizing, and defending each possible solution.</p> |

| | <p>maintaining the code of practice. D4. Develop financial, teamwork, management, decision-making, time management, organization, sales and marketing skills</p> | | <p>3.1.5. Anticipate positive and negative outcomes by reviewing assumptions, inconsistencies, and unintended consequences. 3.1.6 Recommend and/or implement the most viable solution, including monitoring parameters, to measure intended and unintended consequences. 3.1.7. Reflect on the solution implemented and its effects to improve future performance. 3.2. Educator (Educator): Educate all audiences by determining the most effective and enduring ways to impart information and assess understanding. Learning Outcomes 3.2.1. Conduct a learning needs assessment of constituents who would benefit from pharmacist-delivered education (e.g., patients/caregivers, technicians and interns, pharmacy students, fellow pharmacists, other healthcare providers, legislators). 3.2.2. Develop learning objectives. 3.2.3. Select the most effective techniques/strategies to achieve learning objectives. 3.2.4. Demonstrate the ability to coordinate educational efforts with other healthcare providers, when appropriate, to ensure a</p> | | |

Learning Outcomes

3.4.1. Establish a climate of shared values and mutual respect necessary to meet patient care needs.

3.4.2. Define clear roles and responsibilities for team members to optimize outcomes for specific patient care encounters.

3.4.3. Communicate in a manner that values team-based decision making and shows respect for contributions from other areas of expertise.

3.4.4. Foster accountability and leverage expertise to form a highly functioning team (one that includes the patient, family, and community) and promote shared patient-centered problem solving.

3.5 Cultural Sensitivity (Includer): Recognize social determinants of health to diminish disparities and inequities in access to quality care.

Learning Outcomes

3.5.1. Recognize the collective identity and norms of different cultures without overgeneralizing (i.e., recognize and avoid biases and stereotyping).

3.5.2. Demonstrate an attitude that is respectful of different cultures.

4.3.4. Assess personal strengths and weaknesses in entrepreneurial skills.
 4.3.5. Apply entrepreneurial skills within a real or simulated entrepreneurial activity.
 4.3.6. Conduct a risk-benefit analysis for implementation of an innovative idea or simulated entrepreneurial activity.
 4.4. Professionalism (Professional): Exhibit behaviors and values that are consistent with the trust given to the profession by patients, other healthcare providers, and society.
 Learning Outcomes
 4.4.1. Demonstrate altruism, integrity, trustworthiness, diligence, flexibility, patience, humility, and respect in all interactions.
 4.4.2. Display preparation, initiative, and accountability consistent with a commitment to excellence.
 4.4.3. Deliver patient-centered care in a manner that is legal, ethical, and compassionate and free of conflict of interest.
 4.4.4. Demonstrate an awareness that one's professionalism is constantly evaluated by others.
 4.4.5. Engage in the profession of pharmacy by demonstrating a commitment to its continual improvement.

27. Graduate attributes: At the end of the program, the Pharm.D. graduates will have the following criteria:

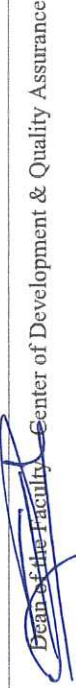

1. Develop, integrate, and apply knowledge from the foundational and clinical sciences related to pharmacy education and practice.
2. Provide a patient-centered care as the medication expert.
3. Identify problems; explore and prioritize potential strategies; and design, implement, and evaluate a viable solution through evaluating medical literature, conducting pharmaceutical research in pharmacy settings, and updating information.
4. Work ethically and legally as part of a team with leadership and communication skills.
5. Express self-awareness for continuous professional improvement.

Pharm.D. program Learning Outcomes:

Knowledge and understanding: Upon successful completion of undergraduates Pharm.D. program, should be able to:

| | |
|---|--|
| A1. Define the fundamentals of scientific knowledge and principles of biomedical, pharmaceuticals, social, behavioral, administrative, therapeutics, and other basic sciences related to the pharmacy profession. | |
| A2. Illustrate the physicochemical and pharmacokinetic properties of medicines and their influence on compounding, evaluation, analysis, route of administration, and dosage regimen. | |

 Head of Department
 Quality Unit

 Dean of the Faculty

 Rector

- A3. Identify broad knowledge about the mechanism of action, effectiveness, use, safety, side effects, and interactions of therapeutic agents as well as the complementary therapies.
- A4. Recognize the advanced concepts of professional (ethics, policies, laws, regulations requirements, management, pharmacovigilance, Pharmacoepidemiology, pharmacoeconomic, pharmacoinformatic, research studies, sources of information.... etc) to optimize the therapeutic outcomes.
- A5. Describe the role of pharmacists in patient care; dispensing, designing, implementing, monitoring, evaluating, and adjustment of medication therapy plans that are patient-specific and evidence-based to achieve maximum clinical effectiveness.

Cognitive/ Intellectual Skills: Upon successful completion of undergraduates Pharm.D. program, should be able to:

- B1. Integrate the physicochemical properties of medicines to compounding, preparation, and analysis of parenteral nutrition, I.V admixtures, and small-batch preparation.
- B2. Predict the drug properties including the bio-pharmaceutics, pharmacokinetics, pharmacodynamics and their applications.
- B3. Merge the pharmacological knowledge about natural and synthetic medicines with policies, information systems, workforces, service delivery, pharmacovigilance, pharmacoepidemiology, and pharmacoeconomic factors to enhance the healthcare systems.
- B4. Formulate an appropriate pharmacotherapy care plan and monitoring strategies to solve practice problems and improve patient safety and efficacy through utilization of pharmacodynamic, pharmacokinetic parameters of medicines as well as diseases pathophysiology and research outcomes.
- B5. Compare various therapeutic options using scientific research and evidence-based practice to optimize efficacy, safety, and cost for each drug-related problem.

Practical & Professional Skills: Upon successful completion of an undergraduates Pharm.D. program, should be able to:

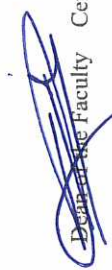

- C1. Deal safely and effectively with biotechnological, radio-pharmaceuticals, and synthetic/natural pharmaceutical materials/products used in pharmaceutical preparations.

 Head of Department
 Quality Unit
 Dean of the Faculty
 Center of Development & Quality Assurance
 Rector

- C2. Compound/prepare extemporaneous, cytotoxic, I.V admixture, parenteral nutrition, and small-batch pharmaceutical preparation taking into account the physicochemical properties of drug structures.
 - C3. Contribute to creating/improving national drug policies, laws, and regulations related to the health care systems.
 - C4. Implement patient-oriented pharmaceutical care legally and ethically in a variety of patient care settings in collaboration with patients and other health care professionals according to professional standards, appropriate therapeutic guidelines, and research outcomes.
 - C5. Contribute to pharmaceutical research studies and clinical trials needed to enhance professional decisions to optimize medicine use in specific medical conditions
- D. General and Transferable Skills: Upon successful completion of an undergraduate Pharm.D. program, graduates should be able to:**
- D1. Display ethically and legally leadership, time management, critical thinking, problem-solving, communication, team-work, independence, creativity, innovation, entrepreneurial, delegation, and organizational skills
 - D2. Develop life-long learning, in particular an awareness of the need for continuing education, research, scholarship, and professionalism in the field of pharmaceutical practice.
 - D3. Use digital pharmacy health improvement and educational technologies efficiently.
