2021/2022

1) Basic Information of the program:	
Program Title	Master of Clinical Biochemistry and Molecular Biology.
Awarding Institution	University of 21 September for Applied & Medical Sciences
Division/institute responsible for the program	Biochemistry and Molecular Biology department/ Faculty of Laboratory Medicine
Program type	Single
Language of study	English
Year of study in the program	2022
Mode of delivery	Regular, minimum attendance 75%
Teaching institution	Faculty of Laboratory Medicine
System of study	Semester system
Duration of study	The program is at least two years full time program that includes advanced theoretical for two semesters and Research work for at least a year. The total number of credit hours to obtain a MSc degree is 38 credit hours, including courses and thesis.
Final award/s available	Master Degree in Clinical Biochemistry and Molecular Biology.
Award title	Master of Clinical Biochemistry and Molecular Biology
Qualification for admission to the program	The Bachelor's degree in: Diagnostic and Laboratory medicine.
Grade for admission to the program	As per the admission rules made by Ministry of Higher education and scientific research-Yemen Republic
Other requirements	Satisfactory outcome of an interview evaluating background.
Data of program specification (New program)	2022
Prepared by	- Prof. Dr. Mojahed Ali Measar Associated Prof. Dr. Ebtessam Al-Zabedei Assistant. Prof. Dr. Nawal Al-Henhena Assistant. Prof Dr.Nabeel Al-Oeri Assistant Prof. Dr. Gamil Abdul-Mughni
Program coordinator:	Assistant. Prof. Dr. Nawal Al-Henhena

2) Program Overview:

The program provides students a broad background in Clinical Biochemistry and Molecular Biology and techniques used in advanced researches in the field. It is offered for laboratory medicine students who hold the bachelor degree in Laboratory Medicine or Diagnostic Medicine. The graduate students from this program should be completed 38 credits hours

2021/2022

Biochemistry Master Program/ Department of Biochemistry and Molecular Biology/ Faculty of Laboratory Medicine.

3-University Vision, Mission, and Goals:

University vision 2025:

A contemporary university with national responsibility and a faith identity

University mission:

Leading the transformation in the management and delivery of health care with all partners by setting a standard of excellence in education and medical and applied research in a way that meets the needs of Yemeni society, its privacy and regional influence.

University objective:

1- Ensuring the application of quality standards and setting standards of excellence in medical and applied sciences, scientific research and community service.

2. The centrality of the student in the educational process, the partnership with them for life, the consolidation of the principles of national responsibility and faith identity, their care and the development of their capabilities after graduation and during work.

3. Attracting, employing and retaining scholars, cadres and highly specialized talents to gain minds and reverse the trend of "brain drain" in a way that enhances and ensures the creation of thinkers, businessmen and good citizens.

4. Continuous development of the distinguished academic infrastructure and the establishment of modern research and service centers with high efficiency and capable of making a real impact locally and regionally.

5. Enhancing the university's position as a preferred partner for local, regional and international partnership through implementing innovative models of education, exchanging research and knowledge and providing real and effective outcomes for developing professional practices to benefit from them locally and regionally

B. Mission, Goals, and Learning Outcomes of the master program

Mission:

To provide highly qualified graduate skilled in the Clinical Biochemistry and Molecular Biology through advanced practical training and conducting scientific research.

the program aim is to

- 1- Produce health science professionals and in-depth Biochemistry and Molecular Biology knowledge of different metabolic, cellular, and genetic disorders
- 2- Provide our candidate with the ability to apply different and recent molecular biological and genetic techniques
- 3- Improve the research skills and productivity relevant to clinical biochemistry and practice
4. Enhance self-development and collaborative practice
5. Promote leadership and teamwork to deliver high-quality health care services
- 6- Provide opportunities to gain research capacity and publish scientific relevant studies

Graduate Attributes of the program

Upon successful completion of the program in master of Clinical Biochemistry and Molecular Biology, the graduates will reflect

1. Deep discipline advanced knowledge in the fields of Biochemistry and Molecular Biology.

2. Independence of critical and analytical thinking, both within their field of study, and beyond for the use of their knowledge for service to others.

3. Ability to identify and suggest possible solutions to ethical dilemmas that occur in their work and field of study, and understand the importance of professional ethics in all aspects of scientific communication and laboratory work.

4. Leadership and competency in the laboratory, including application of the scientific method and appropriate use of basic and state of the art laboratory tools and techniques.

5. Professional written and oral skills necessary for communication of research, knowledge, and ideas to scientists and non-scientists alike.

III. Intended Learning Outcomes from the program:

A. Knowledge and understanding:

At the end of the course the student should be able to

- | | |
|---|---|
| 1 | Understand the basic Specific knowledge in medical Biochemistry and molecular biology, including molecular genetics and immunology, cellular, and DNA technology coupled with hands on skills and leadership skills for a successful career. |
| 2 | Describe the important mechanisms of cellular, molecular genetics and immunology disorders, eliminated, clarify treatment and outcomes of diseases with emphasis on cellular and molecular genetics. |
| 3 | List the key considerations and principles in the planning and design of a study on the basis of statistical methods. |
| 4 | Identify different metabolic, molecular causes of diseases and deep comprehensive of using different laboratory techniques for proper diagnosis |

B. Intellectual Skills:

At the end of the course the student should be able to

- | | |
|---|--|
| 1 | Interpret and explain results of Clinical Biochemistry and Molecular Biology and effectively to clinicians |
| 2 | Illustrate important clinical biochemistry and molecular genetic disease. |
| 3 | Design guidelines for the prevention, diagnosis and treatment of genetic disorders |
| 4 | Classification of genetic disorders |

C. Professional and Practical Skills:

At the end of the course the student should be able to

- | | |
|---|---|
| 1 | Demonstrate diagnostic laboratory tests in clinical biochemistry, molecular genetics, molecular and cellular immunology to offer basic advice on relevant investigations |
| 2 | Design laboratory diagnostic experiments in clinical biochemistry and genetic molecular |

2021/2022

3	Evaluate hypotheses relevant to the practice of clinical Biochemistry Molecular Biology.
4	Perform quality control and assurance procedures
D. General and Transferable outcomes:	
<i>At the end of the course the student should be able to</i>	
1	Communicate effectively through oral presentations, computer processing and presentations, and written reports.
2	Respect the role of staff and co-staff members regardless of degree or occupation.
3	Write scientific article according to the basics of scientific research

Program Standards & Benchmarks

Academic Standards:

- NARS (national academic references standard) for medical education in Yemen
- Academic Standards Curriculum Criteria of Accreditation Board
- Unified Regulations for Student Affairs, Ministry of Higher Education and Scientific Research

Benchmarks

1-Faculty of medicine and health Sciences, Sana'a university, Yemen

System of Study	
I-Duration of program	2 years maximum 4 years divided into courses and thesis
II- Structure of the program:	Total contact number of credit hours 38
-First year	Program-related essential courses and Students ILOs
Thesis	MSc thesis subject should be officially registered after pass the theoretical part and got in minimum 75%. Discussion and acceptance of the thesis could be set at least after 12 months from MSc registering date.

Program Courses

	Courses name	Courses code	Credit hours
1	Analytical Biochemistry I	03,11,311	2
2	Advanced Biochemistry I	03,11,312	2
3	Comparative Biochemistry	03,11,313	2
4	Cellular and Molecular Biology	03,11,314	2
5	Advance Immunology	03,11,315	3
6	Biomedical Statistics & Epidemiology	03,11,316	2
7	Analytical Biochemistry II	03,11,317	2
8	Advanced Biochemistry II	03,11,318	2
9	Advanced Clinical Biochemistry	03,11,319	3
10	Advanced Molecular Genetics	03,11,320	2
11	Biotechnology and Bioinformatics	03,11,321	2
12	Research Methodology	03,11,322	2
13	Thesis		6
	Special course MS Program (chose one)		4
I	Special Topics in Cancer biology		2
II	Selected Topics according to thesis		2
	Total		36

The study plan for Master of Biochemistry and Molecular Biology:

Year Semester	Course Title / Description	Courses code	CRIDET HOUR	Number of weeks
First Year/ First Semester	Analytical Biochemistry I	03,11,311	2	16
	Advanced Biochemistry I	03,11,312	2	16
	Comparative Biochemistry	03,11,313	2	16
	Cellular and Molecular Biology	03,11,314	2	16
	Advance Immunology	03,11,315	3	16
	Biomedical Statistics & Epidemiology	03,11,316	2	16
			13	
	Analytical Biochemistry II	03,11,317	2	16
First Year/ Second Semester	Advanced Biochemistry II	03,11,318	2	16
	Advanced Clinical Biochemistry	03,11,319	3	16
	Advanced Molecular Genetics	03,11,320	2	16
	Biotechnology and Bioinformatics	03,11,321	2	16
	Research Methodology	03,11,322	6	16
	Thesis		6	0
	Special course MS Program (chose one)		20	
	Special Topics in Cancer biology		2	16
	Selected Topics according to thesis		2	16
	Total		36	

(Handwritten mark)

2021/2022

Teaching Strategy

Teaching Strategy	Description of how it will be used
Lectures	It is the most frequently employed teaching method to convey knowledge and explain theories to students in large groups or in sessions, which consist of more than one group gathered in one classroom.
Seminars	These are mainly used with small groups of students in which they find better chances for discussing and negotiating the different concerns of their studies.
Lab experiments	Students doing practices in medical labs individually or in small groups.
Training	This is a practical kind of course where the students are required to plan and execute some field visits to hospitals, corporations or institutions where the process of clinical pharmacy is essential.
Discussion	This is done by allowing the students to ask questions during the lecture and respond to them by the lecturer or other students for the purpose of establishing and clarify the subject of the lecture strongly and increase the concentration and absorption of the student and the attention and not to enter the boredom.
Presentations	Helps the students to be more confident with themselves and make them to show the others what knowledge they have acquired. It can be followed in many types of courses and tasks.
Self-learning	Self-learning is the process by which learners teach themselves using any materials or resources to achieve clear goals without the direct help of the teacher
Case study	Case studies are defined as the scientific documentation of a single clinical observation which is so important study design in advancing medical scientific knowledge especially of rare disease.
Office Hours	Office hours are hours determined by the faculty member (professor of the course) to which the student studies. The hours allocated by the professor to meet with his students to help them and answer their queries in the event of any questions they may not be enough time for the lecture to answer it.

Assessment Strategies	
Written examinations	Final Term exam is conducted at the end of each course.
Oral exams	For selected courses
Technical or practical reports /Presentations	As indicated in the course specification
Assignments including problem-solving exercises	The entire assignments including problem-solving exercises of coursework activities during the teaching period of each course (which includes group and individual work, tests and presentations, etc.)
Individual and group project work	As indicated in the course specification
Quizzes	For all courses except for project
Home work	For all courses except for project

Project Assessment:	
Each project will be assessed by a committee of three members as follows:	
Item	Marks Distribution
Project supervisor	60%
Internal examiner: a member of the department staff.	20%
External examiner: a qualified external examiner (either from other departments of the faculty or from another university)	20%
Total	100%

Characters of program graduates:

1. Committed to Islamic traditions.
2. Have the knowledge and skills needed to provide health care services with reliable laboratory findings.
3. Demonstrate professionalism through honesty, integrity and confidentiality of patient results.
4. Demonstrate respect for the dignity and privacy of patients.
5. Communicate effectively and inspire confidence with patients, colleagues, physicians, and other health care team members.
6. Possess basic knowledge in conducting scientific research.
7. Contribute to the general wellbeing of community and respect the religious culture and social constants of society.

Annex-1 Program Structure
