II. Course Description:

Advanced Immunology provides an in-depth understanding of the immune system. The course covers a wide range of topics, including: The structure and function of the immune system, cellular and molecular mechanisms of immunity, Antigen processing and presentation, Tissue-specific immune responses, Immune-mediated pathologies and Vaccination

III. Alignment Course Intended Learning Outcomes with program outcomes

III. Course Intended Learning Outcomes (CILOs)		Referenced PILOs
A. Knowledge and Understanding: <i>Upon successful completion of the course, students will be able to:</i>		
a1	Describe the structure and function of the immune system.	A2
a2	Discuss the immune responses to infection, tumors, allergens, and autoimmunity	a4
B. Intellectual Skills: <i>Upon successful completion of the course, students will be able to:</i>		
b1	Explain the cellular and molecular basis of immunity	B1
b2	Illustrate the immune responses damage and potential immunotherapy for the treatment of disease	B2
C. Professional and Practical Skills: <i>Upon successful completion of the course, students will be able to:</i>		
c1	Perform different immunological diagnostic assay such as agglutination, precipitation, Enzyme-linked immunosorbent assay, Western blotting etc.	C1
c2	Evaluate the potential of immunotherapy for the treatment of disease	C2
D. Transferable Skills: <i>Upon successful completion of the course, students will be able to:</i>		
d1	Communicate effectively about immunology to a variety of audiences	D1

XI. Course Policies:

1	Class Attendance: Class Attendance is mandatory. A student is considered absent and shall be banned from taking the final exam if his/her absence exceeds 25% of total classes.
2	Tardiness: -If the student dose not attend for more than 6 times, the student will be obligated to withdrew from the course
3	Exam Attendance/Punctuality: No student shall be allowed to the exam hall after 30 minutes of the start time, and shall not leave the hall before half of the exam time has passed.
4	Assignments & Projects: Assignments and projects must be submitted on time. Students who delay their assignments or projects shall lose the mark allocated for the same.
5	Cheating: Cheating is an act of fraud that results in the cancelation of the student's exam or assignment. If it takes place in a final exam, the penalties stipulated for in the Uniform Students' Bylaw (2007) shall apply.
6	Forgery and Impersonation: Forgery/Impersonation is an act of fraud that results in the cancelation of the student's exam, assignment or project. If it takes place in a final exam, the penalties stipulated for in the Uniform Students' Bylaw (2007) shall apply.
7	Other policies: The University official regulations in force will be strictly observed and students shall comply with all rules and regulations of the examination set by the Department, Faculty and University Administration

II. Course Description:

This course provides an in-depth study of the structure, function, and pathogenesis of bacteria. Topics include the morphology, physiology, genetics, and biochemistry of bacteria; the mechanisms of bacterial pathogenesis; the diagnosis and treatment of bacterial infections; and the prevention of bacterial infections.

III. Alignment Course Intended Learning Outcomes with program outcomes

III. Course Intended Learning Outcomes (CILOs)

Referenced PILOs

A. Knowledge and Understanding:

Upon successful completion of the course, students will be able to:

a1 **Describe** an in-depth of bacterial physiology, including growth, replication, and metabolism.

A2

a2 **Discuss** the mechanisms of bacterial pathogenesis

A4

B. Intellectual Skills:

Upon successful completion of the course, students will be able to:

b1 **Explain** the genetic mechanisms that underlie bacterial pathogenesis, the principles of bacterial genetics and antibiotic resistance.

B1

b2 **Design** guidelines for prevention, control of infection/disease and antibiotic treatment regimens used for managing microbial and immunological diseases.

B3

C. Professional and Practical Skills:

Upon successful completion of the course, students will be able to:

c1 **Identify** and characterize microbial pathogens

C1

D. Transferable Skills:

Upon successful completion of the course, students will be able to:

d1 **Communicate** effectively through oral presentations, computer processing and presentations, and written reports.

D2
