III. Course Intended Learning Outcomes (CILOs) : Upon successful completion of the course, students will be able to:		Referenced PILOs	
A. Knowledge and Understanding:		I, P or M/A	
a1	Describe the basic of pharmacokinetics and pharmacodynamics of drugs.	M	A1 Describe the general and basic sciences related to human body structure and functions with emphasis on normal and abnormal conditions.
a2	Explain the drugs affecting on nervous system and type of NSAID , Antibiotics, Antifungal ,antiprotozoal and anti-viral drugs .	M	A4 Recognize the local and international guidelines, ethics, disease management, prevention and other risk factors that affect community health.
B. Intellectual Skills:			
b1	Demonstrate the drugs used in the treatment of nervous system disorders and antimicrobial drugs.	A	B1 Compare between normal and abnormal conditions and predict the appropriate treatment or intervention.
b2	Confirm, the core skills of writing for appropriate prescription for specific disease	A	B2 Analyze and interpret the finding from history, clinical examination and investigations to propose a diagnosis and develop a shared management plan for common acute, chronic and urgent physical and mental health presentations.
C. Professional and Practical Skills:			
c1	Examine the activity of different drugs in	P	C1 Perform complete clinical

	specific disease			examination and precise investigations to reach the final diagnosis
c2	Prepare and Perform experiments on animals to observe the effect of drugs on animals	P	C2	Prescribe appropriate drugs taking in mind the benefits, side effects, interactions, safety and availability.

D. Transferable Skills:

d1	Uses of computer and internet to improve their skills in research.	I	D2	Work individually or in a team and develop lifelong learning using up to date technology that help in understanding the diseases and its control and prevention.
d2	Work and communicate seriously and ethically with patient and his collagenous to develop work and get better results.	I	D3	Respect the different cultural beliefs, ethics, personalities, privacy and values for patients and community with a good behavior and follow the institutional and national roles of medical practice
