information systems, and the quality of information systems. Health, strategic information management in healthcare networks

III. Course Intended Learning Outcomes (CILOs) : (مخرجات تعلم (المقرر)	Referenced PILOs (مخرجات تعلم البرنامج)
A. Knowledge and Understanding: Upon successful completion of the course, students will be able to:	
a1 - Demonstrate knowledge and understanding of essential facts, concepts, theories and principles of computer technology in field of health services	A1
B. Intellectual Skills: Upon successful completion of the course, students will be able to:	
b1 Propose suitable appropriate techniques to minimizing the cost and maximizing the performance. when storing, processing and transmit in Computer practice in the health organizations and facilities .	B2,B3
b2 Evaluate the process of design and how problems with defective code can be resolved.	
C. Professional and Practical Skills: Upon successful completion of the course, students will be able to:	

Prepared by:	Reviewed by:	Head of the Department:	Vice Dean for Quality affairs	Dean of College:
Asst.prof Abdulrahman Mohammed Obaid	Asst.prof Mohammed Al-Shamahi	Asst.prof.	Asst.prof Mohammed Al-Shamahi	Asst.prof. Jamil Ahsan Mujalli

c1	Implement software's to process design and how problems with defective code can be resolved in health services.	C1 ,C2
c2	Apply the Modeling of Health Information Systems to develop a solutions related to healthcare	
D. Transferable Skills: Upon successful completion of the course, students will be able to:		
d1	- Work effectively individually or with others to solve problems	D1,D5
d5	Write efficiently code, which ensures a perfect communication between staffs and health services.

X. Course Policies: (Based on the Uniform Students' By law (2007) تترك كما هي)

	Class Attendance:
1	Class Attendance is mandatory. A student is considered absent and shall be banned from taking the final exam if his/her absence exceeds 25% of total classes.
	Tardiness:
2	A student will be considered late if he/she is not in class after 10 minutes of the start time of class.
	Exam Attendance/Punctuality:
3	No student shall be allowed to the exam hall after 30 minutes of the start time, and shall not leave the hall before half of the exam time has passed.
	Assignments & Projects:
4	Assignments and projects must be submitted on time. Students who delay their assignments or projects shall lose the mark allocated for the same.
	Cheating:
5	Cheating is an act of fraud that results in the cancelation of the student's exam or assignment. If it takes place in a final exam, the penalties stipulated for in the Uniform Students' Bylaw (2007) shall apply.
	Forgery and Impersonation:

II. Course Description:

This course aims to provide students with the knowledge, cognitive, practical, and general skills in medical information technology and systems. The course deals with the computerization of registration systems in hospitals and clinics. This course focuses on health institutions' systems and information processing, modeling health information systems, engineering of hospital information systems, and the quality of information systems. Health, strategic information management in healthcare networks

III. Course Intended Learning Outcomes (CILOs): (مخرجات تعلم المقرر)

A. Knowledge and Understanding: Upon successful completion of the course, students will be able to:

- a1 - Demonstrate knowledge and understanding of essential facts, concepts, theories and principles of computer technology in field of health services

B. Intellectual Skills: Upon successful completion of the course, students will be able to:

- b1 Propose suitable appropriate techniques to minimizing the cost and maximizing the performance. when storing, processing and transmit in Computer practice in the health organizations and facilities .
- b2 Evaluate the process of design and how problems with defective code can be resolved.

C. Professional and Practical Skills: Upon successful completion of the course, students will be able to:

- c1 Implement software's to process design and how problems with defective code can be resolved in health services.
- c2 Apply the Modeling of Health Information Systems to develop a solutions related to healthcare

D. Transferable Skills: Upon successful completion of the course, students will be able to:

- d1 - Work effectively individually or with others to solve problems
- d2 Write efficiently code, which ensures a perfect communication between staffs and health services.
