II. Course Description:

The hospital training course is designed to integrate the student skills and knowledge of pharmacology, therapeutic and clinical courses in practice real cases to identify and resolve different treatment related problems. Students will participate in medical ward rounds, case seminars & hospital education programs. Available rotations include cardiology, oncology/hematology, critical care, neurology, nephrology. Students will be involved in clinical research & assignments, as well as in patient monitoring. The level of student competency will be demonstrated to a panel of clinical teacher-practitioner.

III. Course Intended Learning Outcomes (CILOs) : Upon successful completion of the course, students will be able to:

Referenced PILOs Learning out of program

A. Knowledge and Understanding:

a1	Understand the role and responsibilities of a clinical pharmacist in identifying and resolving different treatment related problems of selected cases of cardiology, oncology/hematology, critical care, neurology, and nephrology.	A1, A2, A3
----	---	------------

B. Intellectual Skills:

b1	Design appropriate pharmacotherapy treatment and monitoring plan for selected cases of cardiology, oncology/hematology, critical care, neurology, nephrology.	B1, B2
----	---	--------

C. Professional and Practical Skills:

c1	Provide rational pharmacotherapy regimen according to the patient specific condition.	C1, C2, C3
c2	Apply appropriate patient monitoring parameters regarding the selected cases of cardiology, oncology/hematology, critical care, neurology, nephrology.	C1, C2, C3
