## II. Course Description:

This course provides students with an introduction to the fundamental principles, components, and operation of radiologic equipment. The focus is on understanding the X-ray tube, radiographic systems, and basic equipment safety. The course also covers equipment calibration, maintenance, and quality assurance techniques to ensure optimal performance of diagnostic equipment in clinical settings.

## VII. Assignments:

| No.   | Assignments | Week Due | Mark | Aligned CILOs (symbols) |
|-------|-------------|----------|------|-------------------------|
| 1     |             |          |      |                         |
| 2     |             |          |      |                         |
| Total |             |          | 10   |                         |

## VIII. Schedule of Assessment Tasks for Students During the Semester:

| No.   | Assessment Method | Week Due | Mark | Proportion of Final Assessment | Aligned Course Learning Outcomes |
|-------|-------------------|----------|------|--------------------------------|----------------------------------|
| 1     | Midterm Exam      | 7        | 10   | 10%                            | a1, a2                           |
| 2     | Practical Exam    | 10       | 30   | 30%                            | a1, a2, b1, b2, c1, c2, d1, d2   |
| 3     | Case Study Report | 6        | 10   | 10%                            | b1, b2                           |
| 4     | Final Exam        | 14       | 50   | 50%                            | a2, b1                           |
| Total |                   |          | 100  | 100 %                          |                                  |

## IX. Learning Resources:

### 1- Required Textbook(s) (maximum two ):

- 1- Stewart C. Bushong - Radiologic Science for Technologists\_ Physics, Biology, and Protection (2016, Mosby)
- 2- Jennifer Kissane, Janet A. Neutze Harjit Singh, 2020, Radiology Fundamentals Introduction to Imaging & Technology, Sixth Edition, Springer Nature Switzerland

### 2- Essential References:

- 1- Robert Fosbinder, Denise Orth., 2012, Essentials of radiologic science, Wolters Kluwer Health - Lippincott Williams & Wilkins
- 2- Chris Guy, Dominic Ffytche, 2005, An Introduction to the Principles of Medical Imaging (rev. ed.)

### 3- Electronic Materials and Web Sites etc.:

### X. Course Policies: (Based on the Uniform Students' By law (2007))

|   |                                                                                                                                                                                                                                                                                |
|---|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | <b>Class Attendance:</b><br>Class Attendance is mandatory. A student is considered absent and shall be banned from taking the final exam if his/her absence exceeds 25% of total classes.                                                                                      |
| 2 | <b>Tardiness:</b><br>A student will be considered late if he/she is not in class after 10 minutes of the start time of class.                                                                                                                                                  |
| 4 | <b>Assignments &amp; Projects:</b><br>Assignments and projects must be submitted on time. Students who delay their assignments or projects shall lose the mark allocated for the same.                                                                                         |
| 5 | <b>Cheating:</b><br>Cheating is an act of fraud that results in the cancelation of the student's exam or assignment. If it takes place in a final exam, the penalties stipulated for in the Uniform Students' Bylaw (2007) shall apply.                                        |
| 6 | <b>Forgery and Impersonation:</b><br>Forgery/Impersonation is an act of fraud that results in the cancelation of the student's exam, assignment or project. If it takes place in a final exam, the penalties stipulated for in the Uniform Students' Bylaw (2007) shall apply. |
| 7 | <b>Other policies:</b><br>The University official regulations in force will be strictly observed and students shall comply with all rules and regulations of the examination set by the Department, Faculty and University Administration.                                     |
| 3 | <b>Exam Attendance/Punctuality:</b><br>No student shall be allowed to the exam hall after 30 minutes of the start time, and shall not leave the hall before half of the exam time has passed.                                                                                  |

## II. Course Description:

This course provides students with an introduction to the fundamental principles, components, and operation of radiologic equipment. The focus is on understanding the X-ray tube, radiographic systems, and basic equipment safety. The course also covers equipment calibration, maintenance, and quality assurance techniques to ensure optimal performance of diagnostic equipment in clinical settings.

## III. Course Intended Learning Outcomes (CILOs) :

Prepared by:

Reviewed by:

Dr. -----

Head of the Department:

Dr. Awadh Al-Kubati

Quality Unit:

Dr. Mohammed  
Al-shamahi

Dean:

Dr. Abdulsalam  
Dalaq

Upon successful completion of the course, students will be able to:

#### A. Knowledge and Understanding:

a1

Understand the basic principles of radiologic equipment operation and components.

a2

Describe the functioning and components of an X-ray system and related devices.

#### B. Intellectual Skills:

b1

Analyze the operational characteristics of radiologic equipment.

b2

Evaluate equipment performance and identify operational issues.

#### C. Professional and Practical skills:

c1

Demonstrate the safe operation of basic radiologic equipment.

c2

Perform basic calibration and maintenance of radiologic systems.

#### D. Transferable Skills:

d1

Communicate technical information effectively in a clinical setting.

d2

Collaborate in teams to troubleshoot equipment issues and propose solutions.

### IV. Course Contents:

#### A. Theoretical Aspect:

| No. | Units/Topics List                                      | Sub Topics List                                         | Number of Weeks | Contact Hours |
|-----|--------------------------------------------------------|---------------------------------------------------------|-----------------|---------------|
| 1   | <b>Introduction to Radiologic Equipment</b>            | – Types of radiologic equipment, X-ray systems overview | 1               | 2             |
| 2   | <b>X-ray Tube Components</b>                           | – Cathode, anode, focusing cup, filament                | 1               | 2             |
| 3   | <b>X-ray Tube Operation and Controls</b>               | – Tube current, tube voltage, exposure factors          | 1               | 2             |
| 4   | <b>High-Voltage Generator and Transformers</b>         | – Step-up and step-down transformers, voltage control   | 1               | 2             |
| 5   | <b>Radiographic Control Panel and Exposure Factors</b> | – mAs, kVp, exposure time, safety settings              | 1               | 2             |
| 6   | <b>X-ray Beam Quality and Filtration</b>               | – Beam intensity, filtration, half-value layer (HVL)    | 1               | 2             |

| 15                                             | <b>Final Practical Exam</b>                         | 1               | 2             |
| <b>Number of Weeks /and Units Per Semester</b> |                                                     | <b>11</b>       | <b>22</b>     |

**C. Tutorial Aspect (if any):**

| No.                                            | Tutorial | Number of Weeks | Contact Hours |
|------------------------------------------------|----------|-----------------|---------------|
| 1                                              | None     |                 |               |
| 2                                              |          |                 |               |
| 3                                              |          |                 |               |
| <b>Number of Weeks /and Units Per Semester</b> |          |                 |               |

**VII. Teaching Strategies:**

- Lectures
- Hands-on Training
- Case Studies
- Demonstrations
- Group Discussions

**VII. Assessment Methods:**

- Written Exams
- Practical Exams
- Assignments
- Quizzes

## VII. Assignments:

| No.   | Assignments | Week Due | Mark |
|-------|-------------|----------|------|
| 1     |             |          |      |
| 2     |             |          |      |
| Total |             |          | 10   |

## VIII. Schedule of Assessment Tasks for Students During the Semester:

| No.   | Assessment Method | Week Due | Mark | Proportion of Final Assessment |
|-------|-------------------|----------|------|--------------------------------|
| 1     | Midterm Exam      | 7        | 10   | 10%                            |
| 2     | Practical Exam    | 10       | 30   | 30%                            |
| 3     | Case Study Report | 6        | 10   | 10%                            |
| 4     | Final Exam        | 14       | 50   | 50%                            |
| Total |                   |          | 100  | 100 %                          |

## IX. Learning Resources:

### 1- Required Textbook(s) (maximum two ):

1. Stewart C. Bushong - Radiologic Science for Technologists\_ Physics, Biology, and Protection (2016, Mosby)
2. Jennifer Kissane, Janet A. Neutze Harjit Singh, 2020, Radiology Fundamentals Introduction to Imaging & Technology, Sixth Edition, Springer Nature Switzerland

### 2- Essential References:

1. Robert Fosbinder, Denise Orth., 2012, Essentials of radiologic science, Wolters Kluwer Health - Lippincott Williams & Wilkins
2. Chris Guy, Dominic Ffytche, 2005, An Introduction to the Principles of Medical Imaging (rev. ed.)

### 3- Electronic Materials and Web Sites etc.:

#### Electronic Materials and Websites

## X. Course Policies: (Based on the Uniform Students' By law (2007))

|   |                                                                                                                                                                                                                                                                                |
|---|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | <b>Class Attendance:</b><br>Class Attendance is mandatory. A student is considered absent and shall be banned from taking the final exam if his/her absence exceeds 25% of total classes.                                                                                      |
| 2 | <b>Tardiness:</b><br>A student will be considered late if he/she is not in class after 10 minutes of the start time of class.                                                                                                                                                  |
| 4 | <b>Assignments &amp; Projects:</b><br>Assignments and projects must be submitted on time. Students who delay their assignments or projects shall lose the mark allocated for the same.                                                                                         |
| 5 | <b>Cheating:</b><br>Cheating is an act of fraud that results in the cancelation of the student's exam or assignment. If it takes place in a final exam, the penalties stipulated for in the Uniform Students' Bylaw (2007) shall apply.                                        |
| 6 | <b>Forgery and Impersonation:</b><br>Forgery/Impersonation is an act of fraud that results in the cancelation of the student's exam, assignment or project. If it takes place in a final exam, the penalties stipulated for in the Uniform Students' Bylaw (2007) shall apply. |
| 7 | <b>Other policies:</b><br>The University official regulations in force will be strictly observed and students shall comply with all rules and regulations of the examination set by the Department, Faculty and University Administration.                                     |
| 3 | <b>Exam Attendance/Punctuality:</b><br>No student shall be allowed to the exam hall after 30 minutes of the start time, and shall not leave the hall before half of the exam time has passed.                                                                                  |
