

Student name:

Logbook for pediatric ward internship

2024-2025

Group:

Prepared By Dr. Noura Noreddeen

Dear medical house officers

This time is the most critical period for you.

It is the point to change from student to a practitioner.

It is your time to take decision. Which specialty you will have?

You should learn in 2 months most of the scientific subject discussion, you learn the practical work in an academic way, the rules of the hospital& the department. How the doctor deal with his patient. The most common problems in your country& in the pediatric field.

In your internship, you should respect the senior, cooperation with colleagues, harmony with the medical staff members, and empathy with patient& help people as you can do.

If you are absent for one day, you should do another day instead of.

It is the time to learn from every hospital, every department, every doctor, every nurse& every patient.

You may work in the countryside in a rural area, where is no consultant or specialist or even some senior one!!!

It is just 2 months to learn everything in pediatrics.

The time will not be again. The train will go away.

I hope the best for all of you.

Do your best dear.

This logbook guide you how to learn in systemic way to be successful doctor in the future.

General notes:

- ✚ Every student must has 10 histories& 10 examinations (for every system)
- ✚ At the end of the 2nd month, you will have a documented evaluation
- ✚ You must be familial with pediatric VS& measures taking
- ✚ You must be familial to take history from a mother
- ✚ You will be familial with discussion
- ✚ Know the medical problem
- ✚ How to speak with relative
- ✚ How to use growth chart
- ✚ Empathy to patient
- ✚ Respect to senior

In morning meeting:

- ✚ You should attend the morning meeting daily early before all.
- ✚ You must be involved in the meeting discussion to learn.
- ✚ You should have 2 seminars in your ward.
- ✚ You should have clinical pearls.

In the daily inpatient round:

- ✚ All beds must are divided between all of you equally.
- ✚ You are responsible for follow up your case daily regarding:
- ✚ Vital signs, examination, follow investigations and the results.
- ✚ You must counsel your patient about when, who F/up after discharge.
- ✚ You should be a good observer, assistant in all the ward medical procedures.

In the outpatient clinic:

- ✚ You should take sample history before the senior doctor.
- ✚ You should read about common pediatric problems.
- ✚ You must learn how to think& put a diagnosis
- ✚ You should do the family counselling.
- ✚ Read about nutrition& vaccination.
- ✚ Read about growth, development.

In E/R:

- ✚ Learn about triage system.
- ✚ Don't write diagnosis or treatment.
- ✚ You should be ready for any surprise.
- ✚ You must have PBLs before emergency training.
- ✚ You must read the most common emergency problems.
- ✚ You should guess management with the supervisor doctor.
- ✚ Put in your mind that E/R is a critical time& place for both; doctor& patient.

In duty:

- ✚ Do all of them together
- ✚ Learn how to depend on yourself.

Seminars should be prepared as PowerPoint.

Every student should introduce his presentation himself.

Pearls is a short notes on a specific subject told orally after the morning meeting.

You should have the signature of the head of department in your logbook for everyone.

Scientific activity	Title	Day& Date	Signature
Seminar			
Seminar			
Pearls			
Pearls			
Pearls			
Pearls			
Pearls			

Medical procedures that you should see 3 times, assist 3 times then may do it 1 time.

Either in E/R, P/W, POP, PICU& NICU:

- ⊙ BLS
- ⊙ NRP
- ⊙ N/G tube
- ⊙ Oxygen flow
- ⊙ Cannula insertion
- ⊙ Lumbar puncture
- ⊙ IV fluid preparation
- ⊙ Bone marrow aspiration
- ⊙ Blood products transfusion
- ⊙ Mechanical ventilation follow up
- ⊙ Central venous line using& cleaning

Medical procedures:
